ART FROM THE UKRAINE

14th August to 18th September

The peaceful landscapes and delicate still-lives in this exhibition belie the turbulent past of the country of origin, the Ukraine. While the disintegration of the USSR has left the former states economically and politically fragile, their previously repressed cultures have now finally found their voices. Art From The Ukraine captures the changing face of the country, with both rural and urban landscapes and gives a unique opportunity to view some breathtakingly beautiful works of art.
